

# AD Fosfomicin 0.25-256

## Ready to use Agar Dilution panel

Liofilchem® and the Liofilchem company logo are registered trademarks of LIOFILCHEM s.r.l.

The new AD Fosfomicin 0.25-256 is the first and only (international patent pending) ready-to-use commercially available kit for performing the agar dilution antimicrobial susceptibility testing, in compliance with the CLSI and EUCAST standards, with 4 months shelf life at present.

The AD Fosfomicin panel comprises 12 wells, containing the antibiotic incorporated into an agar medium in different concentrations, i.e. 11 two-fold dilutions (0.25-256 µg/mL).

The AD Fosfomicin 0.25-256 panel is the first of a series of agar dilution panels, which will be available as both standard and custom versions, in terms of antibiotics and concentrations.
